Welcome to the Fall 2022 semester at OLLI. It’s early summer as we write this, but the fall semester is already upon us. We hope you’re enjoying your summer but are as eager as we are for fall classes to begin.

We always look forward to the start of classes, but even more so this year. It was 40 years ago this semester when our predecessor, the Institute for Learning in Retirement, opened its doors with 11 courses and 80 members. The growth and changes that have occurred over the past 40 years are significant, but what is more significant, and meaningful, is the impact OLLI has had on its community of learners over those years—from friendship and social opportunities to the proven health benefits of lifelong learning. We are planning a celebration for this milestone—be on the lookout for details.

As you read the catalog, you will see the incredible array of courses to which you’re accustomed. Approximately two-thirds of our classes will be held in-person this fall with the remainder online. Returning safely to in-person classes has been, and remains, our priority. Academics, whether in-person or online, are an integral part of what makes OLLI at AU stand out, but it is the sense of community that makes it truly special. This fall will mark our most significant attempt to recapture that sense of community with a return to the most in-person classes and social events since the start of the pandemic.

Membership gives you access to all the semester’s recorded online classes and to our digital library of previous semesters’ course recordings. We also will continue our Friday lecture series that we expect will be a mix of in-person and online. The Friday newsletters will contain links to the Friday lectures.

We are excited to offer more in-person social activities and events this fall. In addition to our 40th anniversary celebration, we intend to have our annual holiday party and other opportunities to gather with friends.

Membership fees will be $300 for the fall semester or $550 for both the fall and spring semesters. The fee entitles you to register for four classes (three pre-lottery and a fourth post-lottery). As always, we ask you to prioritize classes in order of those you are most interested taking. You may identify up to 12 courses in your pre-lottery registration. The fall lottery is September 6, and the semester begins on September 19.

OLLI is at its best when committed members, volunteers, and staff are invested in this community of lifelong learners. We thank you—members and volunteers—for your contributions. We give special thanks to our Study Group Leaders (SGLs) who spend months preparing for these great courses, to the Curriculum Committee who recruit and work closely with SGLs, and to the staff who strive every day to make your OLLI experience a good one.

David Hensler    Tony Long
Chair, Board of Directors   Executive Director

In conformance with American University policy, any person attending Fall 2022 OLLI-related classes or events in any AU facilities, must be fully vaccinated and boosted, with certain medical and religious exemptions.

WHAT IS OLLI AT AU?

Drawing on the talent and experience of seniors in the Washington, DC area, the Osher Lifelong Learning Institute (OLLI) at American University offers a unique opportunity to continue learning at the university level. Members come from varied social, economic, and career backgrounds, ranging from business, academia, and homemaking to education, the arts, and government service. What they have in common is a genuine interest in continuing their learning experiences and intellectual stimulation by participation in an organization with other “seasoned learners.” There are no educational prerequisites for membership in OLLI.

Learning Community
The basic concept of the program is that of peer learning and teaching designed, specifically, for people who are 50 years of age or older. Members participate fully in study groups through preparation for, and involvement in, discussions on a wide variety of subjects. There are no tests and no grades; members participate purely for the joy of learning. Members are encouraged to discuss the possibility of leading a study group with members of the Curriculum Committee and by participating in our Study Group Leader Training Orientation.

Membership Involvement
Members become involved not only as Study Group Leaders or representatives but also as participants on an elected board and appointed committees. As a democratic membership organization, OLLI depends on the volunteer services of its members. Members are strongly encouraged to participate in one or more of the following:

- The Board of Directors and its various committees develop and implement policies, procedures, and activities designed to enhance the overall program.
- Study Group Leaders (SGLs) are members with special expertise or interests who wish to share these with other members by designing and leading study groups. They are entitled to free classes during the semester they lead a group or the following semester.

HOW IS OLLI AT AU ORGANIZED?

OLLI at AU is an independent, 501(c)(3) nonprofit organization incorporated in Washington, DC, and is part of the Osher Lifelong Learning Institute National Network, which now includes 125 Institutes in all 50 states and the District of Columbia.

Support of OLLI at AU
Membership fees ($300 for the semester or $550 for both fall and spring) support the program. OLLI is further supported by an endowment from the Osher Foundation given to, and managed by, American University. OLLI receives a percentage of the interest from the endowment annually to assist in funding OLLI’s operations.

The Friends of OLLI Fund, established by the Board of Directors, is a reserve fund helping OLLI maintain affordable tuition, expand and enhance its physical facilities, and develop innovative and diverse programs.

THE ABCs OF OLLI

Accessibility
OLLI makes every effort to accommodate members with visual and hearing impairments. We provide documentation in large print format, ask our Study Group Leaders to turn on captions for all videos, and offer technical support. Please contact the office if you need accommodations to access classes, handouts, or any OLLI materials.

Adding or Dropping Study Groups
Members may add, drop, or change study groups through the second week of a semester.

Books
Books are available through Politics and Prose bookstore at 5015 Connecticut Avenue NW, Washington, DC 20008, 202-364-1919 or politics-prose.com online. Books also can be ordered online (often at reduced prices) or purchased at other book stores. The following are some online suggestions for purchasing books, in alphabetical order:

- AbeBooks.com, AddAll.com, Alibris.com, Amazon.com,

Contact Information
Please log into your OLLI account to ensure your contact information, including home and cell telephone number(s), email, as well as emergency contact name and relationship, are current and accurate.

Directory of Members
We publish a member directory each semester listing members’ names, addresses, phone numbers, and emails. Please fill out this section of the registration form carefully. The directory is available online to download during the second week of class. Printed copies are available upon request.

Drinks and Snacks
Coffee and tea are available in the Social Space on the 5th floor for OLLI members. There are also vending machines with water, soda, and snacks on the 4th and 6th floors.

Email and E-Newsletter
We use email as our primary means of communication. Please make sure that you check your email several times per week during the semester. Also we send a weekly newsletter via email.

Fourth Study Group
After class assignment letters are emailed to members on Sept. 7, members may login to the website to add a free fourth study group or email the office at olli@american.edu. You can only add a fourth study group after class assignment letters have been emailed after the lottery.
Handouts
Downloadable class handouts are available each academic session on the handouts page of the OLLI website under “Study Groups” or “Shorts.” Handouts remain available through the end of the session. If no handouts are listed for a class, we have not received any from the Study Group Leader. Some SGLs prefer to email handouts to their class members directly or have them printed (for in-person classes) in lieu of placing them on the website.

Hearing Loops
All of OLLI’s classrooms are equipped with hearing loops, a state-of-the-art assistive listening technology. Most recent hearing aids are equipped with a t-coil. Your audiologist can tell you whether or not your hearing aid has a t-coil and, if it does, your audiologist can activate the t-coil.

With the t-coil turned on, a member can hear others in the room very clearly. Members who do not have hearing aids or who have hearing aids without t-coils, can use a loop receiver with a headset, to benefit from the loop. Each classroom is supplied with a number of loop receivers.

Identification in Classes
For in-person and hybrid classes, please wear your OLLI name tag. Lanyards and plastic name tag holders are available in the hallway outside the office.

For online classes, click on the Participants Panel and rename yourself with your full name so that the Study Group Leader can call on you.

Lecture Series
We offer four Lecture Series throughout the year. During each semester there is a lecture on Fridays from 1:30-2:30 PM. In January and May, there are lectures on various weekday mornings from 10:30-11:30 AM.

Lost and Found
There is a lost and found box located outside the OLLI office. Please check there if you have misplaced something.

Lunchtime Options
There is a cafeteria on the 6th floor which serves hot and cold breakfast and lunch. Members can also brown bag lunch with OLLI friends in one of the social spaces on the 5th floor. Buy lunch to carry out or eat in at Pizzeria Paradiso, Millie’s, Starbucks, or Wagshal’s Market — all within one block of 4801 Massachusetts Ave. NW.

Membership Fee
The fee paid each semester (or for the full academic year) is a membership fee. It allows members to take from one to three study groups for the semester. The fee is NOT a fee per study group. The membership fee entitles you to all of the benefits of membership at OLLI at AU.

Minis
Minis are study groups held once-a-week for four weeks during the month of June. Each day’s session in the four weeks is 1 1/2 hours long.

Parking

Privacy Policy
OLLI at American University is highly sensitive to the privacy interests of members and believes that the protection of those interests is one of its most significant responsibilities. If you have questions about this policy, please contact us by phone at 202-895-4860 or email at olli@american.edu.

Current members also have access to OLLI’s permanent digital library, which contains recorded courses from previous sessions. Visit our website at www.oli-dc.org to view recordings throughout each session, as well as the digital library.

REGISTRATION PROCESS

Registrations are due by 8:00 AM Tues., Sept. 6, for the Fall Lottery. Class sizes are determined by Study Group Leaders' requests, classroom capacity, and the office. If a study group is oversubscribed on Lottery Day, registrations in that class are subject to a random, computerized lottery. Members who are not selected for said study group are put on the waitlist and will be emailed by the office if space becomes available. **Class assignment letters will be emailed on Wed., Sept. 7.**

We will continue to accept registrations on a space-available basis through the second week of the semester. **OLLI reserves the right to cancel any study group. Members registered in a study group that is cancelled will be notified immediately so that they may select an available alternate.**

JOIN OLLI AT AU

You may join OLLI, pay for membership, register for study groups, and donate to OLLI, all at once. To do so, complete the form on the following pages. 4. Follow the instructions under Register for Study Groups.

CLASS FORMATS: IN-PERSON, ONLINE & HYBRID

OLLI offers classes in three formats: online, in-person, and hybrid. In hybrid classes, the SGL and some members of the class are in-person while other members participate via Zoom. In the catalog, each course description lists the format. When registering for a hybrid class, you must select whether you want to attend in-person (Hybrid In-Person) or by Zoom (Hybrid Zoom). List both formats if the class is a priority and you're willing to attend either format. Given the greater number of options, you can now prioritize up to 12 classes for the lottery, instead of just six. As always, the lottery will then assign you to up to three classes.

REGISTER FOR STUDY GROUPS

1. Identify the number of study groups you are interested in taking. **You must select 1, 2, or 3.**

2. Prioritize up to 12 study groups based on your preference for taking the study groups.
   - (1 = highest priority and 12 = lowest priority).
   - If the class is hybrid, be sure to include your desired format, in-person or online. If you are willing to attend either in-person or online, be sure to list each format for the class. See the example on the registration form.

   Note: Prioritize your study groups by whichever method works best for you: subject matter, time/day, location, or Study Group Leader. Even if you mark that you only want to take one study group, you may still prioritize up to 12 study groups. When the system processes your registration, it will assign you to your highest priority study groups that are available.

   **Note:** All members have an equal chance at getting into a class. There is no restriction if a member has taken a Study Group or Study Group Leader previously.

3. Submit your registration.

4. You will receive email confirmation of your pending registration.

5. After Lottery Day, you will receive by email your class assignment letter.
   - Through the second week of classes, you can change your schedule online or by emailing the office.

   You may register online for a fourth course AFTER you have received your class assignment letter.

   **Study Group Leaders spend a prodigious amount of time preparing their classes. Please attend the classes for which you are registered and only the classes for which you are registered.**

DONALD T. BLISS
Seven Thursdays (9:45 AM - 11:15 AM)
September 22
In-Person

Mark Twain, whose first novel gave the name to an era, The Gilded Age, was a political commentator who used humor and stories to deliver his views about American democracy. The course will explore ten lessons from Twain’s writings that are essential to a healthy democracy—among them: an informed and engaged public; elected leaders of character who put loyalty to country above loyalty to party; a Congress which represents all the people and not just moneyed influence; a private sector that rewards innovation, invention, and a skilled workforce; and a foreign policy that favors diplomacy over military intervention. We will discuss how Mark Twain’s words resonate today.

This study group is a repeat.

Class Format: Reading and Discussion
Reading: 1 hr/week.

Don Bliss has written two books, a play, and several articles about Mark Twain and politics. He served 13 years in the federal government and over thirty as an attorney in Washington, DC. He is the grandson and great grandson of Mark Twain’s publishers.

Digital platforms—think Google, Facebook, Amazon, etc.—are emerging as powerful challengers to the prerogatives of national governments. issues ranging from privacy to competition policy to cybersecurity have become headline news. This course will seek to establish a clearer picture of platforms, their political, economic, and legal impact, and the response of governments to platforms’ incursion into areas traditionally occupied by national governments. This study group is a repeat with revisions.

160: Public Education: Purpose, Progress, Perils, and Politics

MARTIN BLANK
MICHAEL USDAN

Seven Thursdays (11:45 AM - 1:15 PM)
September 22
Online

Public education is a cornerstone of American democracy. While real progress has been made, our public schools face extremely serious challenges today. What should children read? What should they learn? Should public funds be used for religious education? Can we maintain the number of teachers and school leaders we need? What is the role of school boards, and are they being politicized? These and other issues lead to even larger questions: Is the public education enterprise being lost? Is educating for democracy no longer possible when democracy itself is at risk? This course will examine these issues in the context of the basics of how public education is governed and financed, a changing of student population, and persistent school segregation. Participants should be prepared to join a robust discussion.

This study group is a repeat with revisions.

Class Format: Lecture and Discussion
Reading: Less than 1 hr/week.

Martin Blank was Director of the Coalition for Community Schools and a consultant on numerous education and social policy issues. September 20  
In-Person  
This study group will explore the important cases and decisions that continue to be made by the Supreme Court under Chief Justice John Roberts. Presentation material and discussion will focus on the major constitutional issues being decided by a clearly activist and divided court on: elections, health care, gun control, diversity, equality, climate change, the environment, religion, and presidential power. We will focus on the historical and political background of these issues and the legal philosophies of the justices, along with the procedural mysteries of this, the least well known of our three branches of government. We will read The Supreme Court: A Very Short Introduction by Linda Greenhouse and The Oath: The Obama White House and the Supreme Court by Jeffrey Toobin, along with articles on more recent cases and other supplementary material. 
This study group is a repeat with revisions.  
Class Format: Lecture and Discussion

She was educated at Skidmore College, Johns Hopkins University, and the Kennedy School at Harvard.  
185: What Is Rural?  
JOE BELDEN  
Eight Thursdays (9:45 AM - 11:15 AM)  
September 22  
In-Person  
Urban, suburban, and rural America are increasingly divided in culture, politics, and other ways. Why is this so, and should urban people care? This course will examine those, and other questions, such as—How is rural defined? What is the Farm Bill, and what does USDA do? Is our system of food production and consumption damaging our environment and health? Do we need national food and rural policies? Why are rural and farm programs so fragmented? Who are the main actors in these issues? What is the status of often overlooked rural groups such as veterans and residents of Appalachia, the South, farmworker areas, Indian country, and the Southwest borderlands? And what is the role of rural nonprofits? 
This study group is a repeat with revisions.  
Class Format: Lecture and Discussion  
Reading: 1-2 hrs/week.  
Joe Belden has led several OLLI study groups. From 1975 to 2015, he worked mostly in the DC nonprofit world as a manager, fundraiser, advocate, and writer/researcher, focusing on issues of affordable housing, rural poverty, and food policy. He also worked at USDA and on Capitol Hill.
can illuminate politics and government in ways that journalism, history, and biography often cannot. We will discuss how authors such as Ward Just, Anthony Trollope, Robert Penn Warren, CP Snow, Edwin O’Connor, Hilary Mantel, and William Shakespeare, and plays and movies featuring major political figures, have provided insights into the character, incentives, motivations, and behavior of the inhabitants of the world of politics and government in a variety of different times and contexts. We will consider how much of what is described and shown depends on time and context, how much is more fundamental, and how to tell the difference.

This study group is a repeat with revisions.

Class Format: Discussion
Reading: 2-3 hrs/week.

James Verdier has taught at Harvard and Princeton, and has worked in the US House and Senate, the Congressional Budget Office, and state government in Michigan and Indiana. 200 PSYCHOLOGY, SOCIOLOGY, & CULTURE

200: Neuroscience of Conflict
JEANINE HULL
Seven Mondays (1:45 PM - 3:15 PM)
September 19
In-Person
This course will explore the amazing new breakthroughs in understanding the neuroscience of trauma and apply it to the study of conflict. Both trauma and conflict are manifestations of the human threat response (HRT), and scientific understanding of that response has vastly deepened in the past 20 years with the introduction of new technologies like fMRIs, CT scans, and PET scans. I apply this new understanding to our understanding of conflict, how to productively engage with and manage it, and in particular, the benefits that accrue from such engagement.

This study group is a repeat with revisions.

Class Format: Lecture and Discussion
Reading: 1-2 hrs/week.

Jeanine Hull, author of the book Making Peace with Conflict: Using Neuroscience to Ease Difficult Relationships, has been an attorney and mediator for the past 40 years. Immigration stories are central to American mythology; perhaps best captured in the poem, The New Colossus, inscribed within the Statue of Liberty. Our ancestors each contributed a patch that together make an American quilt. A guide to discovering your family story involves a common path, working backwards from oral history through census and other documents to discover ancestral homes. Then each path diverges; we will investigate three 20th-century case studies: (1) a pre-World War I Italian emigration; (2) a Danish emigration between the two great wars; and (3) a post-World War II emigration from Germany. Together they illustrate the adaptability required to find one’s roots.

207: The Psychology of Parenting Adult Children
ANNE KENDALL
CAROL WEISSBROD
Eight Wednesdays (1:45 PM - 3:00 PM)
September 21
In-Person
Our children will always be our children. Yet, our children emerge as adults, and through our own aging process and their own development, different issues in need for closeness, consultation and advice, perspective, and priority emerge. Key thematic issues that inform the relationships between parents and their adult children are questions of—whose life is it?, validation, and boundaries. This course will explore these issues from the perspective of the parent and the adult-child, using information from the fields of developmental and clinical psychology. The course format will involve lecture, discussion of readings, and participant sharing of parent-adult/child issues relevant to thematic course content. This study group may have a copied materials fee between $5-20. If this is the case, class members will be sent more information after the lottery. This study group meets from 1:45 to 3:00 PM.

275: Both Sides Now: Reflections for Women at Midlife

COLETTE TRACY
Eight Fridays (11:45 AM - 1:15 PM)
September 23
Online
This class is about the empowerment of women through midlife years and beyond. As women, we have always felt that we need to care for, love, and put others first, especially for the women of our generation. This was the way we were raised from our mothers, the “Silent Generation.” It is at midlife, that for perhaps the first time in our lives, we can begin to focus on ourselves and what we want to do. Sometimes we feel a bit lost at this stage, mainly because we have never had this opportunity. This is the time to get healthy, create a community of like-minded people, and plan for the things that can bring us joy.

ROBERT KOLODNEY
Ten Wednesdays (11:45 AM - 1:15 PM)
September 21
In-Person
The backbone of this study group is Rationality where Steven Pinker explains reasoning—how it works, its role in material and moral progress, looking at logic, brain function and collaboration. He reviews our media-driven culture of partisan divide—the widespread parroting of opinions that are patently untrue and the refusal by many to consider others’ points of view. Since Rationality provokes many questions, we will look at context: rapid technological progress vs existential challenges, superstition, philosophy, and science, biological, sociological and economic factors—developments in brain science and psychology—for better managing the interplay of cognition and emotions, governing stress, fear and anxiety, hoping, coping and surviving.

September 20
In-Person
This course will commence with a brief history of addiction and its consequences, including efforts to confront the problems of
alcohol and opioid addictions in the 19th, 20th, and 21st centuries. We will include segments of films that highlight problems with alcohol in men and women, opioid addiction, and other substance-use disorders. We plan to amplify these stories through personal testimony by active members of Alcoholics Anonymous during one of the classes. We will review the neurobiology underlying addiction, as well as the political and socioeconomic factors that contribute to the risk of drug/alcohol use and addiction. We will also review successful and failed national, community, and personal efforts to address drug and alcohol use, as well as epidemics. We will review extant approaches to treatment, as well as a novel approach to the prevention of substance use among the young. In one of the final sessions, we will be joined by the first White House Drug Czar, whose work has been captured in the book, The Fix, by Michael Massing. **297: The Neuroscience of Spiritual and Religious Experiences**

**MARK HOELTER**

**Seven Tuesdays (9:45 AM - 11:15 AM)**

**September 20**

**Online**

Everything humans experience and do is mediated through our brains, including our religions and spirituality. Importantly, our brains comprise more than just the three pounds of grey matter in our heads. Starting in the 1990s some intrepid, creative, down-to-earth researchers with genuine scientific “street cred” began setting off little explosions—intriguing and fascinating explorations of spiritual and religious experiences and the human brains mediating them. They asked, “What happens in the brain when people have experiences they call ‘spiritual’ or ‘religious?’” In this study group we’ll explore some above-the-surface 10% of the proverbial iceberg of their findings to date, and sometimes we’ll dive down deeper. This study group is NEW.

**300 ECONOMICS & PERSONAL FINANCE**

**305: International Trade**

**PATRICK MACRORY**

**Nine Mondays (11:45 AM - 1:15 PM)**

**September 19**

**In-Person**

The enormous growth in world GDP since WWII resulted in large part from the liberalization of international trade, in particular the huge lowering of tariffs. The modern international trading system reached its zenith in 1995 with the creation of the World Trade Organization, which now has 164 members and covers virtually all international trade in goods, services, and intellectual property. However, the WTO has lost its way in recent years. The dispute-settlement system
is in limbo as a result of actions by the Trump Administration. And the Doha Round of trade negotiation collapsed after producing only one non-controversial agreement. After discussing the economic and political importance of trade, the course will describe the development of the modern system and analyze the basic rules. It will cover the difficulties currently faced by the WTO and the prospects for reform, as well as the implications of the massive growth of free-trade agreements. The course will also discuss current trade issues, including the US/China trade “war,” digital trade, and climate change. This study group is a repeat.

Patrick Macrory began his legal career in the UK but has spent the last 50 years practicing international trade law in Washington, DC. He has published extensively on trade and was Editor-in-Chief of a 3,000-page book on the World Trade Organization. His last book, A Business Guide to Trade and Investment, has been translated into Chinese.

**395: Climate Policies: What Works, What Doesn’t**

**MIRIA PIGATO**

**Nine Tuesdays (11:45 AM - 1:15 PM)**

**September 20**

**In-Person**

Climate change is the defining issue of our time. Over 40 countries have committed to reach net-zero carbon emissions by 2050 but these promises have yet to be reflected in actions. Why do politicians fail to take effective measures to tackle climate change? How do we explain the lack of policy cooperation on this global issue? And what would a politically feasible response to climate change look like? This course draws on real-world examples to discuss the challenges posed by climate change and to learn from policy failures and successes. After a brief overview of the science and economics of the climate change problem, the course will discuss: (a) fiscal and financial policies to mitigate and adapt to climate change; (b) the current landscape of international policy issues that inhibit global cooperation; and (c) feasible climate policies that work in the real world.

### 444: Relativity, Gravity, and the Quantum

**JACQUES READ**  
Eight Mondays (11:45 AM - 1:15 PM)  
September 19  
Online  
Science fiction fans are familiar with fictional force fields (invisible volumes of something that exerts a force on objects), but four such fields really exist in nature. Three of them are responsible for keeping atomic nuclei, atoms, and molecules together using fundamental quanta known as Bosons. These are well understood in terms of quantum mechanics. The fourth is gravity and its force field is space and time itself, where, since the Big Bang, matter and energy have been distorting space and time to attract other matter and energy. Some scientists would be happier if gravity were also quantized so that a “theory of everything” existed. This course will discuss the process and consequences.

480: The Ups and Downs of Weather
PAUL BROWN
Ten Mondays (9:45 AM - 11:15 AM)
September 19
Online
This is a beginner’s guide to weather and climate, for which at least a rudimentary familiarity with science will be helpful, but not necessary. The first half of the course will focus on the principal elements that underlie weather—heat, wind, and water—and the second half will show how they interact to produce the major types of bad weather: frontal storms, thunderstorms, supercells, tornadoes, derechos, and hurricanes. The course will conclude with single sessions devoted to the environment (especially global warming) and to atmospheric optics (blue sky, rainbows, halos, auroras, etc.). A profusely illustrated booklet created for the course can be purchased from Amazon for $36, and is highly recommended both as a guide to the lectures and as a useful work of reference. Class members will receive more information about how to purchase the booklet before the course begins.

ALBERT TARAN
Ten Mondays (1:45 PM - 3:15 PM)
September 19
In-Person
The geography that shapes the political and social fate of nations results from long, slow movement of Earth’s crustal plates. We will examine the colossal forces that raise mountains, open and close oceans, and cause volcanos and earthquakes. We will use contemporary geological features from around the globe, and historical events like the formation of supercontinents, to illustrate these processes. We will also examine the formation of the earth and moon, and earth’s internal structure; the unique features of earth’s geological processes proved hospitable to the rise of life.

497: Ancient DNA: The Genome Revolution in the Study of the Human Past
ALBERT TARAN
Ten Wednesdays (1:45 PM - 3:15 PM)
September 21
In-Person
Since 2009, whole-genome data have begun to challenge long-held views in archaeology, history, anthropology, and linguistics—and to resolve controversies in those fields. Ancient DNA and the genome revolution can now answer previously unresolvable questions about the deep past: the question of what happened—how ancient peoples related to each other and how migrations contributed to the changes evident in the archaeological record. We will examine how DNA analysis yields the data needed to answer these questions, and the detailed results generated. We will be guided in this analysis by David Reich’s book *Who We Are and How We Got Here*.

530: War Songs of the 20th Century
FRANCES GRIGSBY, DANIEL MOSKOWITZ
Eight Thursdays (1:45 PM - 3:15 PM)
September 22
In-Person
Armies always marched to music. But “war songs” also become part
of the civilian culture. We'll focus on the 20th century, as advances in technology and distribution—recorded music and the phonograph, radio, television, and portable devices—created a national audience for popular songs. The impact of war became a common subject for both popular and classical music, songs lauding patriotism and courage, but also separation and loss. We will hear those compositions in vintage and more recent performances, from the Spanish-American War through World Wars I and II and the protest anthems of the Vietnam War, and learn from them the values and concerns of America at those times of conflict.

560: The British 20th-Century Narrative Ballet Tradition
IRIS LIPKOWITZ
Eight Thursdays (1:45 PM - 3:15 PM)

Narrative (as contrasted with abstract) ballets have a nearly 200-year European tradition. Think La Sylphide and Giselle. This study group will explore the 20th century narrative ballet tradition of three British choreographers: Frederick Ashton, Antony Tudor, and Kenneth MacMillan, with selections from ballets including: A Month in the Country, The Dream, Enigma Variations, Lilac Garden, Manon, Mayerling, and Romeo and Juliet. Learn about these choreographers and how their ballets differ from their 19th century predecessors. No ballet background is required.

Recognized as Italy's economic engine and leader in the competitive world of fashion and design, Milan has also played a significant role in the history of Western art since it served as a capital of the late Roman Empire. LINDA FREEMAN
Eight Tuesdays (11:45 AM - 1:15 PM)
September 20
Online
After Mary Ann Evans, writing under the pen name of George Eliot, completed her masterpiece Middlemarch, she turned to the creation of Daniel Deronda, her last novel. A mix of social satire and moral searching, it is known also for its sympathetic depiction of 19th century Jewish proto-Zionism featuring experiences wholly new to the Victorian novel. Two great female characters are brilliantly crafted along with a wide spread of other individuals from Bohemians to the wealthy to the inhabitants of London slums. Using her formidable intelligence, acute powers of observation and imaginative sympathy, Eliot creates a challenging, ground-breaking work that clearly calls out for lively, OLLI-style discussion.

655: Early Twentieth-Century American Fiction
RONALD PARLATO
Ten Wednesdays (9:45 AM - 11:15 AM)
September 21
In-Person
The course will study works by Dreiser, Lewis, London, Fitzgerald, Anderson, and Norris, and will present the range of focus, theme, style, and language represented. The early 20th century was remarkable not only for the number of significant authors of the period, but for the variety and diversity of their works, their depth, narrative skill, and surprising modernism. From Sherwood Anderson’s unsettling psychological portraits to Fitzgerald’s elegant prose and finely drawn characters, to Lewis’ and Dreiser’s realism, and to London’s spare philosophical insights, the period was important in the history of American fiction.

Class Format: Lecture and Discussion

657: War and Peace, by Leo Tolstoy
LESLIE FRANTZ
Ten Thursdays (11:45 AM - 1:15 PM)
September 22
In-Person
On any list of the world's greatest novels, War and Peace will take a prominent place. My feeling is that this is a particularly good time to read this book, if you never have, or re-read it, if it has been awhile. Our study of the novel will be through discussion of character and incident, but context will also be important. Historic background of Russian culture, Russia's relationship to Europe, and general review of the Napoleonic Wars, will all enhance our examination of the text.

675: Poems That Talk Back
CLAIRE PETTENGILL
Eight Wednesdays (11:45 AM - 1:15 PM)
September 21
Online
Poets are sometimes moved by another's work to compose poems in response. These “backtalk” poems vary widely and are great fun to study. They can voice mocking rebuttals, respectful disagreement, thoughtful extrapolation, and playful teasing, to give a few examples. Each week, the group will explore poetry that illustrates these dynamics. Members will read the week's poems at home, which will be available electronically. In class, we will share questions and insights, getting to know some wonderful works while building together a relaxed, open-minded atmosphere that welcomes various voices and viewpoints. Poets may include Lucille Clifton, Denise Levertov, W.B. Yeats, A.E. Housman, Terrance Hayes, and many others. This study group is a repeat.
Class Format: Lecture and Discussion
Reading: Less than 1 hr/week.

Eight Thursdays (11:45 AM - 1:15 PM)
September 22
Online
This study group will consist of weekly readings from Zora Neale Hurston's writings, focusing on selections from her fiction, short stories, folk tales, and anthropological work. Much like the August Wilson group, readings will be assigned each week for discussion, no more than 40-50 pages per week, which will include curated Hurston work, plus biographical selections by other writers. Because we will not cover whole books, reading portions will be provided via pdf copies emailed to each participant.

688: Shakespeare in Performance: The Scottish Play
CAROL LIGHT
Ten Thursdays (1:45 PM - 3:15 PM)
September 22
Online
Macbeth is only bad luck when said aloud in a theatre, or so the superstition goes. But we will not be in a theatre while we enjoy and discuss a variety of recorded performances, comparing the same scene in different productions, savoring the language, and considering how the choices made by actors, directors, and designers affect our perception and appreciation of this masterpiece. Witches, ghosts, low brow comedy, and words of soaring beauty combine in a heady sometimes bloody mix of ambition, love, and ultimately tragedy to make Macbeth frequently performed and always fascinating. Recorded performances range from Orson Wells to Denzel Washington, directors include Roman Polanski, Trevor Nunn, and
Kurosawa. The class will not meet on October 20 and 27.

690: Two Trollopes: Anthony and Joanna: The Last Chronicle of Barset and The Rector’s Wife
ELLEN MOODY
Ten Tuesdays (1:45 PM - 3:15 PM)
September 20
In-Person
We’ll read Anthony Trollope’s The Last Chronicle of Barset, the last Barsetshire novel, once seen as his signature book. I’ve read with OLLI classes the first four; there is no need to read these, but we’ll discuss them to start. I advise, if possible, to read the fifth, The Small House of Allington, over the summer. Trollope’s indirect descendant, Joanna Trollope, has recreated the central story of The Last Chronicle in her Rector’s Wife, which we’ll read in the last two weeks, and discuss her book The Choir, another Barsetshire post-text, plus two excellent film adaptations of these in the 1990s.

Class Format: Lecture and Discussion
Reading: 2 hrs/week.

692: Enjoying the Wit of Oscar Wilde
RICHARD PALMER
Ten Wednesdays (1:45 PM - 3:15 PM)
September 21
Online
Oscar Wilde wrote stage plays, short stories, fairy tales, poems, novels, essays, and a couple of personal apologias. His witty dialogue and epigrams are a mother lode of intelligent humor and word play. In this study group, we’ll mine some of his works—principally his stage plays—for the humor and word play of his art, though we may make side trips to apprehend his social satire and criticism, his ironic moral perspective, and his fabled biography. This will be a highly participatory study group and members may want to explore and share extra material. Print editions of Wilde’s plays, short stories, and fairy tales are available new or used on the web. However, most use fonts too small to read without a magnifying glass handy, so I recommend the online Gutenberg Project files of his works: https://www.gutenberg.org/ebooks/author/111 which are complete for our purposes and may be easily enlarged on your computer. This study group has a high class size capacity.

695: The Odd Bunch: Excursions Among the Less Eminent Victorians
JUDITH PLOTZ
Ten Tuesdays (9:45 AM - 11:15 AM)
September 20
In-Person
Some of the great Victorian writers—especially Dickens, the Brontes, and George Eliot—still retain a strong hold on anglophone readers and film makers. But the literary riches of the long Victorian period are immense and many of its most interesting works and writers have been largely forgotten. This study group will unearth some treasures buried by time: these will include autobiographies, an ethnographic novel, a divorce novel in verse, ghost stories, Austenish social novels, bizarre children’s literature, and some hilarious buffoonery.

697: Star-Crossed: Tragic Tales of Love From Around the World
ROBERT CROOG
Nine Mondays (1:45 PM - 3:15 PM)
September 19
In-Person
Happily-ever-after may be the typical Hollywood ending, but tragic love stories have attracted large audiences through the ages. This course will consider many ill-fated lovers both from mythology and real life. Romes and Juliets appear in many settings, with tortuous paths ending in ruin. We will examine what brought these lovers together, then tore them apart. Some were doomed from the start; others might have avoided their tragic endings. Either way, their stories are compelling and, while love doesn’t conquer all, it puts up
a heroic fight. This will be mostly lecture, but with limited discussion
time towards the end of each class.

733: The Coming of the Civil War
WALTER KAMIAT
Eleven Wednesdays (11:45 AM - 1:15 PM)
September 21
Online
America, in the years before the Civil War, became increasingly and
violently polarized over issues associated with southern slavery.
This study group will examine the events, political movements,
ideologies, and social forces of this period which ultimately led to the
Civil War, abolition, and the emergence of a very different nation. The
focus will be to understand these issues as the pre-war participants
did, including their differing visions of the country’s future and
understandings of its constitutional legacy. Interpreting this period
has long generated controversy, and still does. Discussion of these
issues will be encouraged. We will use leading historians’ works on
the era as well as some period materials.

This study group covers the history of eugenics (promotion of the reproduction of the “fittest” humans and suppression of the reproduction of the “unfit”) and racial hygiene (the Nazi version of eugenics) in the late 19th and the first half of the 20th centuries. We will examine how science was used (or rather misused) to support eugenics and racial hygiene and justify practices such as racism, mandatory sterilization, anti-immigration policies, and even, in the extreme case of Nazi Germany, genocide. We will conclude by discussing whether genetic engineering is a new version of eugenics. The course will consist of lectures, film excerpts, readings, and discussion. **This study group has a high class size capacity.** This study group is NEW.

**764: The “Eastern Question”: Then and Now**

**ELIZABETH SHELTON**

Eight Thursdays (9:45 AM - 11:15 AM)
September 22
In-Person

The Eastern Question—European great powers’ relations with the Ottoman Empire, the “sick man of Europe”—dominated European diplomacy during the 18th and 19th centuries. Many historians believe that the Eastern Question ended with the outcome of World War I, and the demise and later division of the Ottoman Empire into 40 independent countries. But did it? This course contends that the legacy of the Ottoman Empire and the geo-strategic factors of the Eastern Question are still being played out today in this very volatile region of the Middle East, the Balkans, the Caucasus, and the Black Sea.

805: Meditation Class

JOSEPH REO
Eight Fridays (9:45 AM - 11:15 AM)
September 23
In-Person
In this class we will meditate together as a group. The primary goal of this course is the systematic, eight-week, on-going commitment, that we come together, weekly, at this same time, with the simple intention to regularly practice the discipline of meditation. It doesn’t matter if you’ve never meditated in your life, or if you’ve done it for 20 years with your own lovely mantra, and years-long routine. I’ll guide us through various “styles,” some perhaps leading us somewhere, some taking us potentially, to a quiet nowhere. We will practice several short meditations each class, or just one. We’ll debrief at the end of the session to talk about what works, what didn’t, what was helpful/useful, and what wasn’t. And we’ll be open to attendees who may wish to take the lead and guide us through a session towards the end. You can show us your style via your years of experience, or just jump in, having fun being adventurous guiding us for the first time. Anyone, and all forays or experimentation into leading, will be welcome. This study group is a repeat with revisions.

Class Format: Lecture and Discussion
Reading: 1 hr/week.

806: Medical Chi Kung

JOSEPH REO
Ten Mondays (9:45 AM - 10:45 AM)
September 19
In-Person
In Asia, for thousands of years, overall health, fitness, and well-being always has considered mind, body, and spirit as a whole. This class will introduce the practice and medical benefits of Chinese Chi Kung, or Qigong, the centuries-old Chinese method of “healing movement.” We will exercise together blending action, breathing, and imagination, to physically energize the body, and promote overall well-being. Through rhythmic movement, relaxed breathing, and mental focus, we’ll practice simple forms, together as a group, to stimulate and heal specific organs, and organ-systems in the body. The easy-to-perform, simple “mudras” will gently release tight muscles, soften ligaments, and coax the lengthening of tendons, which can diminish joint pain and improve balance. You’ll be able to follow along with something, no matter the state of health you are in. You may even learn to feel, and potentially direct the flow of “Chi” to and through specific areas of you body, where you need it most. Exercise modifications will be shown, when requested. Dress comfortably; we’ll start training the first day. Note: Before participating in any exercise program, participants should check with their doctors to ensure that there are no contraindications, special considerations, or limitations from a medical standpoint. This study group meets for one hour, from 9:45 to 10:45 AM.

Sessions will include instruction, guided meditations, and group discussion. Although there is no required reading, participants should plan to practice meditation on their own for at least ten minutes on most days. This study group is appropriate for both beginners and experienced meditators.

860: Plato’s Tragedy, Comedy, and Epic

DON ROSS
Eleven Fridays (11:45 AM - 1:15 PM)
September 23
Hybrid

The purpose of this course is to explore the philosophy of Plato. The focus will be on the three dialogues exemplifying “classical Platonism”—Phaedo, the Symposium, and the Republic. Plato was both a philosopher and a literary artist, but the subtext is that the best artist is the one who understands the theory behind it. Thus, Phaedo, the Symposium, and the Republic also represent Plato’s challenge to the tragedians, comedians, and epic poets of his day.

841: The Philosophy of Science: An Overview of Leading Theories

DON ROSS
Ten Fridays (9:45 AM - 11:15 AM)
September 23
Hybrid

The purpose of this course is to explore the major schools of classical Chinese philosophy—the Taoist, the Mohist, and the Confucian. The first is based on the mysterious Tao Te Ching, followed by The Book of Chuang by Chuang Tzu and the infamous Yang Chu chapter. The second is found in the Book of Mo by Mo Tzu. The third is founded on the Analects of Confucius, but reaches its zenith in the book Mencius, and closes with the “heretical” work of Hsun Tzu. This study group has a high class size capacity.

This study group is NEW.

Class Format: Lecture and Discussion
